SKILLS

TECHNICAL SKILLS

- Program Language: Java, Node.js, Python
- Database: MySQL, SQL Sever, PostgreSQL
- Tools: Github, Gitlab, Postman, Docker
- AI: Trae, Cursor, Git Copilot
- Framework: Springboot, Express.js

SOFT SKILLS

- IELTS: 6.0
- Teamwork & Collaboration
- Problem Solving
- Adaptability & Continuous Learning
- Good Communication

EDUCATION

- HUTECH University
- Software Engineering: 2022 - NOW
- GPA: 3.2

PROFESSIONAL SUMMARY & OBJECTIVE

Motivated final-year Software Engineering student seeking a Back-End Developer Internship. Strong foundation in Object-Oriented Programming (OOP), RESTful API design, and relational database management. Proficient in leveraging AI tools to optimize coding workflows and debugging. Eager to apply skills in Node.js, Java (Spring Boot), and SQL Server to build scalable server-side systems, tackle technical challenges, and contribute effectively to a dynamic engineering team.

KEY PROJECTS

• CLOTHING E-COMMERCE PLATFORM I GRADUATION PROJECT (IN PROGRESS)

TECH STACK: JAVA (SPRING BOOT) / , MYSQL, JPA, OAUTH2, DOCKER

- Architecting a robust back-end system for an online clothing retail platform.
- Designing scalable relational database schemas in SQL Server to manage product catalogs, inventory, and user transactions.

ACHIEVEMENTS

- Participate in the final round of Hutech Code War 2023, 2025
- Participate in the final round of MY FIRST WEBSITE 2024
- Top 3 GenZ Thinking
- Top 3 Pione Dream Hackathon 2025
- Sinh viên 5 tốt 2023-2024
- Sinh viên tiêu biểu 2024-2025

- Developing secure RESTful APIs for user authentication, shopping cart management, and order processing.

• **DOCUMENTOR – AI-POWERED DOCUMENT ANALYSIS & RAG PLATFORM**

TECH STACK: FASTAPI, PYTHON, POSTGRESQL, SQLALCHEMY, PINECONE, GOOGLE GEMINI API · SUPABASE, DOCKER/RENDER, JWT, ALEMBIC

<https://github.com/TuDuc2k4/DocMentor>

- Built a RAG pipeline integrating Google Gemini 2.5 Flash for semantic Q&A over user-uploaded documents.
- Designed RESTful APIs covering JWT authentication, RAG queries, document management, and AI analysis (summary, quiz extraction).
- Deployed production backend on Render with PostgreSQL, handling async document processing via FastAPI Background Tasks.

• **LMSDHL (PRACTICE ENGLISH LMS WEBSITE)**

TECH STACK: ENTITY FRAMEWORK CORE, SQLSERVER, ASP.NET CORE, REPOSITORY PATTERN

<https://github.com/TuDuc2k4/LMSDHL>

- Implemented Repository Pattern architecture with 8+ repositories, ensuring a clean separation of data access and business logic.
- Built RESTful controllers for full CRUD operations, pagination, and filtering of courses and test results.
